

LAYER MACRO

AMINO ACID MINERAL TRACE MINERAL VITAMIN
CONCENTRATE FOR LAYERS

FOR HOME MIXING OF LAYER FEEDS

KEY ADVANTAGES

- Highly concentrated concentrate
- Make maximal use of own/local ingredients
- Contains phytase enzyme which improves feed conversion

EXAMPLES OF FEEDS

INGREDIENT	PULLET DEVELOPER	PULLET PRE-LAYER	LAYER 100	LAYER 115
Maize meal	640	600	600	600
Wheat bran	200	171	116	166
Soybean oilcake meal	125	175	175	125
Feed lime	16	35	90	90
Layer Macro	19	19	19	19
Total (kg)	1000	1000	1000	1000
Composition (%)				
Protein	14.5	16.0	15.3	13.7
Lysine	0.71	0.83	0.80	0.68
Methionine	0.32	0.34	0.33	0.31
Energy (MJ/kg)	11.9	11.7	11.3	11.1
Calcium	1.04	1.73	3.70	3.70
Phosphorous	0.81	0.80	0.75	0.77
Phosphorous (available)	0.45	0.45	0.44	0.44

FEEDING RECOMMENDATIONS

- Mix strictly according to recommendations. Consult a Feedtek nutritionist if alternative ingredients are available
- Pullet developer – feed to pullets from 12 to about 17 weeks of age
- Pullet pre-layer – feed to pullets from about 17 weeks of age until point of lay at about 20 weeks of age
- Feed layer feeds to layers at a daily intake of 100 to 120 grams per layer
